PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Engineering graduate with hands-on experience in Java, Python, Flutter, Dart, SQL, and full-stack software development. Proven track record of building desktop, mobile, cloud-integrated, and computer vision-based applications through internships and academic projects. Strong foundation in building scalable logic, clean interfaces, and database connectivity.

TECHNICAL SKILLS

Languages & Tech: Java, Python, Dart, Flutter, React, CSS

Databases: MySQL, MongoDB, SQL

Tools & IDEs: VS Code, PyCharm, Eclipse

Version Control: Git, GitHub

INTERNSHIP EXPERIENCE

SYNTEXHUB — Web Development Intern **Sep 2026 – Present**

- Building dynamic web applications using React and CSS frameworks to deliver responsive user interfaces.
- Collaborating on frontend architecture, component reusability, and cross-browser UI/UX optimization.

Microsoft Azure Virtual Internship — Cloud & Azure Intern **Jan 2026 – Feb 2026**

- Gained hands-on experience managing Azure cloud services, resource groups, and cloud deployment pipelines.
- Implemented secure database integration and cloud platform configurations to ensure system reliability.

Sansach Technologies — Java Full Stack Intern **Oct 2025 – Dec 2025**

- Developed full-stack web application features, ensuring seamless database connectivity and robust backend logic.
- Applied core Java concepts, object-oriented principles, and SQL database operations in enterprise scenarios.

PROJECTS

Hotel Management System **Core Java, Swing, AWT, MySQL**

- Developed a comprehensive desktop application to streamline hotel operations, employee records, and booking management.
- Designed interactive graphical interfaces using Java Swing/AWT and connected them to a relational MySQL database.

Gesture Volume Controller **Python, OpenCV**

- Built an automated computer vision application that detects and interprets real-time hand gestures.
- Integrated gesture tracking algorithms to smoothly adjust system audio volume based on finger distance metrics.

Expense Tracker Mobile Application **Flutter, Dart**

- Engineered a cross-platform mobile application for real-time tracking, categorization, and budgeting of personal expenses.

- Implemented state management and intuitive UI components to deliver a seamless user experience across devices.

EDUCATION

B.E. Computer Engineering **June 2026**

Dilkap Research Institute of Engineering and Management Studies, University of Mumbai

- **CGPI:** 8.44 | **Percentage:** 75.44%

CERTIFICATIONS

- **Java Full Stack Development Course** – CADD Centre, Thane
- **Microsoft Azure Certification (25 Hours)** – Edunet Foundation
- **Flutter & Dart - The Complete Guide (30 Hours)** – Udemy
